

** Book Club 6PM Pacific, Acquiring The Feldenkrais Profession by Yochanan Rywerant CONTENTS

.....
"Yochanan Rywerant is one of Moshe's original Israeli students and worked for many years at the Feldenkrais Institute in Tel-Aviv. This entire book is devoted to the practice and theory of Functional Integration. Included are sections with Yochanon's thoughts on neurological control of movement movement orientation timing and efficiency pain structure and function example FI sessions and case studies. Valuable reading for every Feldenkrais teacher."

Acquiring The Feldenkrais Profession
by Yochanan Rywerant [BOOK]

WITH APPRECIATION: From Kwan Wong, San Francisco : https://drive.google.com/file/d/1FA96pTkMMzmlL4IQYVwJnS5bw_etmH42/view?usp=sharing

I. Preface

II. Introduction

PART A: THE BASICS

III. Review of various "principles" and "working concepts"

1. Habitual and non-habitual patterns
2. Learning by sensing differences
3. Awareness, a way of changing intentional patterns
4. The stages of baby-development
5. Orientation in space and the field of gravity
6. Hierarchy of levels of control, changing of control-level
7. Clarity of the distal and proximal parts involved in patterns of action
8. Defense mechanisms (anti-patterns)
9. Communicative manipulation (the manipulon)
10. The force-surface-pressure relation, the "surface-like" style
11. Clarifying alternative choices, versus imposing correction
12. Goal-directedness versus attention to process, learning by "playing"
13. Modes of control: sedate, aroused
14. Neutral position versus extreme position
15. The potent state, or readiness to act versus mere relaxation
16. The efficient use of the skeleton (in gravitational field, etc.)
17. Acceptance of proposed new patterns; the "Aha!"-Reaction
18. The constituents of a pattern of action, sensory anticipation

- 19. Corollary discharge and "relative conjugate movements"
- 20. Sensory filtering in habitual patterns
- 21. Cause and effect vs. stimulus and response
- 22. Heuristic learning vs. model imitation
- 23. Using the senses, calibrating the "gain" of the response
- 24. "What stops me?" as a way to go on exploring
- 25. Using existing ("ingrained") patterns and responses
- 26. Agonists and antagonists linked neurologically
- 27. Muscle groups involved in more than one function
- 28. Non-normative approach vs. "indoctrinated" (hidden) norms
- 29. Cortical involvement in unusual contexts and settings
- 30. Different levels of control addressed by different "languages"
- 31. Communications as verbal (serial, digital) and as sensory (images)
- 32. The concepts and functions of monitoring and choice-making
- 33. Reversibility for improved control and efficiency
- 34. The role of pain, "measuring" pain, progress and rate of rehabilitation
- 35. Meta-messages in ATM & FI
- 36. Supplying the missing constituent in a deficient pattern of action
- 37. Pattern recognition as a phase of learning
- 38. Primitive (old) patterns
- 39. Respecting dominance
- 40. The view on posture
- 41. Respecting structure
- 42. Shearing stress and friction, supporting at right angles to surface
- 43. Testing, usually by going to extremes
- 44. Repetition, its rationale
- 45. Integration through change of environment, position or context
- 46. Integration through the head, its rationale
- 47. Keystone-manipulation
- IV. Review of various themes appropriate for frontal talks ("lectures")
 - 1. The origins of patterns of action
 - 2. Communication by words and images
 - 3. Image of action, the map-territory relation
 - 4. Hierarchy in the CNS, levels of control
 - 5. Structure and function
 - 6. The skeleton
 - 7. The Weber-Fechner principle
 - 8. The neutral point
 - 9. On touch

10. Perception of the world
 11. Damage of the CNS
 12. Muscles
 13. The neuron
 14. Entropy
 15. The two hemispheres
 16. Upright stance in the gravitational field
 17. Physical principles
 18. Passivity – activity
 19. Dualism in language and philosophy
 20. Recommending a bibliography
- V. Considerations in ATM
1. "Principles"
 2. Strategy
 3. Tactics
 4. Series of lessons
- VI. Considerations in FI
1. The style of FI
 2. The FI session
 3. The limits of FI
- PART B: Hints of building a curriculum
- VII. General Outline
- VIII. A few additional specific items
1. Didactics of ATM lessons
 2. Didactics of FI demonstrations
 3. Didactics of tutoring FI
 4. Didactics of the practicum

The book has for a long time been out of print, so it is not easy to find.. You could use smart search at different sources: eBay, Amazon, Google It's also available in German translation by title Grundlagen der beruflichen Feldenkrais-Arbeit.

It is noted that "you can read the book for free here: <https://en.b-ok2.org/book/5286569/1360fd>" ~
